### Summary

Cybersecurity enthusiast with a strong interest in penetration testing, red teaming, and ethical hacking. Skilled in identifying and exploiting security vulnerabilities to help strengthen systems and networks. Actively pursuing advanced knowledge about new exploitation techniques. A team player with a proactive approach to learning and problem-solving, aiming to contribute effectively to the field of cybersecurity while continuously honing technical expertise.

### Experience

**Offensive Security Trainee, TAHAKOM** 06/2025 – 09/2025

- Part of penetration testing team on high-production security assessments.
- Discovered **35+ vulnerabilities**, including **critical vulnerabilities**.
- Contributed to technical and **high-level reports** with **risk and remediation**.
- Gained hands-on experience in testing using tools like **Burp Suite, Nmap, and Metasploit and other relevant tools**.

**Cybersecurity Content Specialist, Synapse** 03/2025 – Present

Created **cybersecurity content** for team projects, consistently meeting **deadlines** while demonstrating strong **professional writing skills**.

### Education

**Bachelor's degree in cybersecurity, University of Jeddah** 2021 – 2026

### Certifications

- OffSec Certified Professional Plus (OSCP+)
- Certified Red Team Expert (CRTE)
- Web Application Penetration Tester eXtreme (eWPTX)
- Certified Red Team Professional (CRTP)
- Certified Professional Penetration Tester (eCPPT)
- Mobile Application Penetration Testing (eMAPT)
- Junior Penetration Tester (PT1)
- Certified Red Team Analyst (CRTA)
- Certified Threat Hunting Professional (eCTHP)
- Junior Penetration Tester (eJPT)
- HackTheBox ProLabs (Cybernetics - RastaLabs - Offshore - Zephyr - Dante)

### Accomplishments

**CVE-2025-39245, Common Vulnerabilities and Exposures**  
CSV Injection Vulnerability in some HikCentral Master Lite versions. This could allow an attacker to inject executable commands via malicious CSV data.

**Jahziah badge (wesam), Education and Training Evaluation Commission**  
Earned the Jahziah Badge in recognition of top performance in the Cybersecurity Readiness Exam.

### Top Skills

|----------------------------------------|-------------------------------|
| • Active Directory Penetration Testing | • Network Penetration Testing |
| • Web Penetration Testing              | • Mobile Penetration Testing  |
| • Teamwork                             | • Time Management             |

### Projects

**Google Chrome Password Stealer:**  
This malware decrypts and steals passwords stored in Google Chrome, sending them to the attacker's Command and Control (C2) server without detection from Windows Defender on Windows 10.

**Clickfix Attack Simulation:** ☑  
This Project replicates how threat actors use fake CAPTCHA pages to trick victims into executing malicious code. Designed to raise awareness.

**NRcTwo:**  
This is an IP-less C2 (Command And Control) That I have created that leverages Telegram for communication. This C2 has multiple C2 functionalities.
